

Appendix 2: Consultation with Client

Proof of Consultation

Initial Proposal

Viet Nguyen: Is there anything you are looking for in particular? Maybe in regard to baking and catering?

Jill Cruz: Well now that you mention it, I have this issue when it comes to recipes for baking. I never seem to remember my recipes when it comes to making them.

Viet Nguyen: How did you solve this problem in the past?

Jill Cruz: Well I used to keep paper copies but I always seem to misplace the paper copy.

Viet Nguyen: Why not use online recipes?

Jill Cruz: Well I tried but the recipes never come out how I want. I tend to make changes to the original recipe. Plus, it starts to lose my personal charm when I use online recipes.

Viet Nguyen: Since you have the issue of finding a recipe, would you like a filter feature or a way to search for the recipes?

Jill Cruz: Yes that works, I would also like to edit the recipes as well.

Viet Nguyen: Of course, that should not be a problem at all. I will be finished with the product in around 3 months. Have a nice day!

Development of Program

Viet Nguyen: Hi, would you be willing to answer more questions for me?

Jill Cruz: Of course, is this relating to the database?

Viet Nguyen: Of course, I would like to ask what type of things you would want in your database.

Jill Cruz: Well, do you have any plans in particular and maybe I could add onto?

Viet Nguyen: I plan to add the typical database stuff, accessing the pastries, adding a new pastry, editing a new pastry, deleting, and others. Although, I do want to ask if there's anything you would want to look up.

Jill Cruz: Well besides the name of the pastry, I think I should be able to look up specific ingredients and maybe look up cost?

Viet Nguyen: Would you like a way to sort from the most expensive to the least expensive?

Jill Cruz: Yes, that is perfect thank you.

Viet Nguyen: Is that all you want? I'll be sure to add anything extra that might be beneficial.

Jill Cruz: Well, maybe a way to store some information about the pastry? Maybe I could include some information about whether or not the recipe is a variant or a different type of another pastry? That might be all I believe.

Viet Nguyen: I'll be sure to include that, thank you for your time.

Final Consultation

The client was given three weeks to use the product, then the client was interviewed again after this period. The transcript of the interview goes as following:

Viet Nguyen: What are your thoughts on the product?

Jill Cruz: I think it runs well but I feel as though it is lacking in some aspects.

Viet Nguyen: What do you think it lacks?

Jill Cruz: Well while overall it is user friendly, it lacks some labels. Whenever I try to delete something, it doesn't give me a warning screen and automatically deletes it. So I lose the recipe. While this saves time, I might accidentally misclick the wrong recipe. Is there also a way to undo a delete?

Viet Nguyen: I think with the way my code is made, it is not possible as I use text files and my program deletes the files directly. I can definitely add a warning screen though.

Jill Cruz: That's good, I think another issue is that I can't open multiple recipes at once.

Viet Nguyen: Oh, my apologies, I'll be sure to add that in whenever I can.

Jill Cruz: Thank you! Please add the name of the pastry because that is another labeling issue. Whenever I view a pastry and I click the wrong pastry, I don't know that I clicked the wrong pastry until a bit afterwards. Maybe change the name of the window or put a label that says what the pastry is?

Viet Nguyen: Oh I didn't think of that issue, sorry.

Jill Cruz: It's okay, I think the navigation is fine but there should be a way to cancel what pastry that is being displayed.

Viet Nguyen: Okay I will add both of those features. Were there any more issues?

Jill Cruz: At some point, my recipes might get too long and that causes the recipe to not be fully displayed. I haven't run into this yet but I'd like for you to fix this.

Viet Nguyen: Oh I didn't account for that sorry.

Jill Cruz: That's okay, I think if you can fix this problem, I can start using it for some of my clients to pick which pastry they'd like me to make. Although, maybe a

way to display the serving size would help with this. Besides that, I like the program very much, thank you for the program!

Viet Nguyen: You're welcome, thank you for being my client.
